

i) a. Particulars of Organization

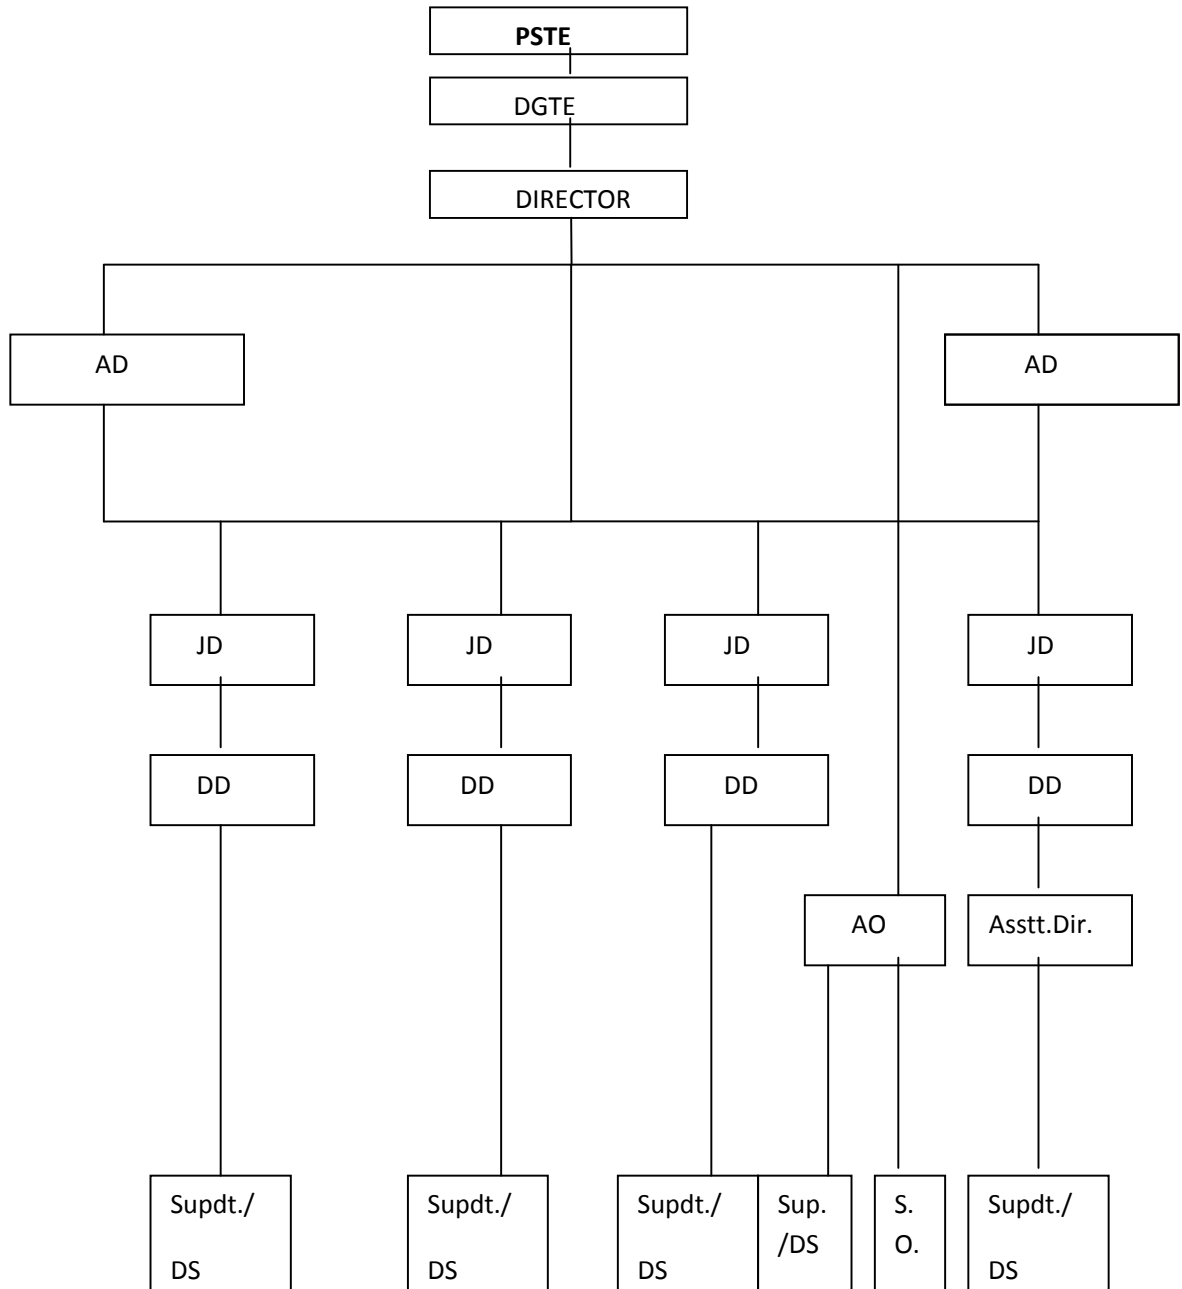

In the present era of rapid industrialization, to ensure minimum acceptable standards, quality remains the main consideration of Department and recent technological advances have necessitated further development in the field of Technical Education. The Technocrats at diploma and degree level play a vital role in the technical upgradation and competitive development of industries in the State. In order to cope up with this requirement, constant development and upgradation of engineers is of utmost need. The Department envisages many programmes for **modernization, strengthening and expansion of Technical Education.**

The Government of Haryana created Directorate of Technical Education to promote, guide and regulate Technical Institutions in the State.

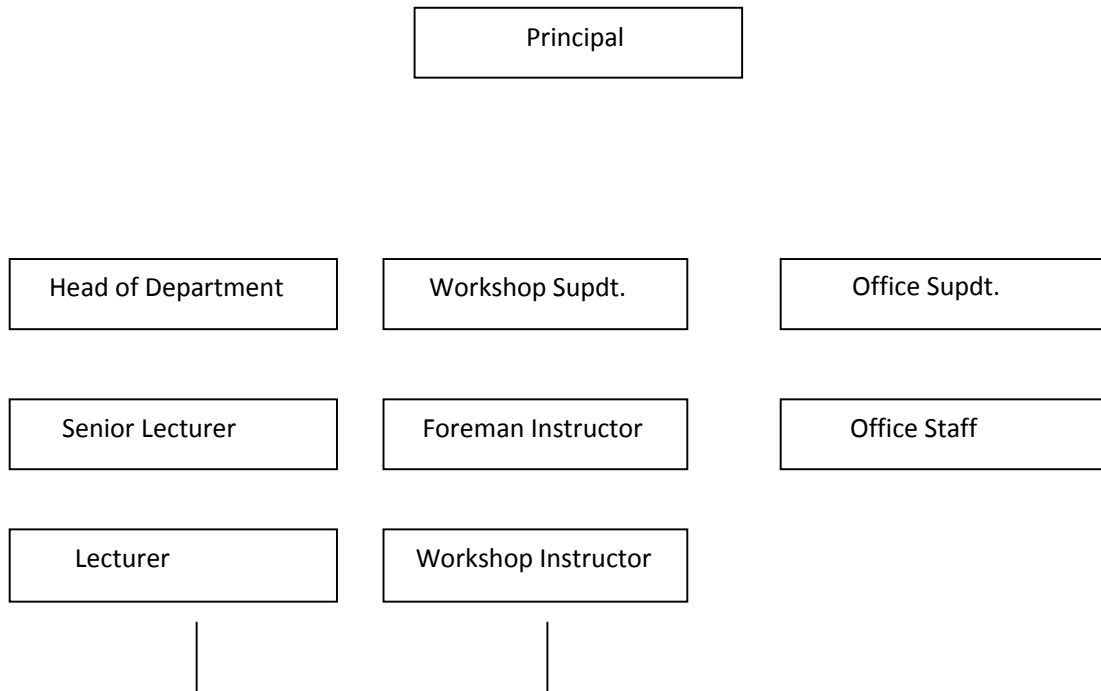

The main responsibility of Technical Education Department is to provide Technical manpower according to the requirement of industry in the State. The main responsibilities of the Department are:-

1. To administer and provide infrastructure facilities to the Institutions functioning under the aegis of the department.
2. To formulate educational policies and programmes pertaining to technical education.
3. To recognize the various courses being run in the Technical Institutions.
4. To start new courses with approval of the All India Council for Technical Education, keeping in view the need of the Industry in the emerging new technologies.
5. To issue NOC for establishment of new degree level Institutions.
6. To expand the training facilities by opening new institutions in the State keeping in view the future requirement.
7. To equip the institutions with the modern machines as per need of the industry.
